

Dr. Abdullah Murad Zamal

MBBS · PAEDIATRICS & NEONATOLOGY

Website: <https://drmurad.uk>

Email: contact@drmurad.uk

Address: Salwa, Kuwait

Nationality: Bangladeshi

As a health professional, I want to serve mankind by playing a vital role in clinical and preventive medicine. I possess the skill in report writing and the capability to work individually as well as in a group. I have qualified knowledge of various computer software necessary for any type of research/analysis. I am looking to join a reputed and growth-oriented health organisation or hospital to face career challenges, develop my skills and techniques with team spirit, serve various types of patients and enhance my reputation as an excellent medical practitioner.

PROFESSIONAL EXPERIENCE

● 01/2023 – PRESENT · SYLHET, BANGLADESH

Senior Medical Officer

Al Haramain Hospital Limited

Department of Paediatrics and Neonatal Intensive Care Unit

Main responsibilities

- Managing patients in the critical care unit, keeping them for observation and making decisions with the help of consultants and sometimes of my own.
- Attending morning rounds with consultants and evening rounds along with Medical Officers, and making decisions accordingly.
- Attending Consultant rounds and informing them from time to time as per requirement.
- Monitoring admitted patients' clinical status and immediate intervention for any deterioration.
- Attending emergency calls from the labour room and operation theatre following delivery of neonates needing NICU support, and shifting them accordingly.
- Immediate primary neonatal resuscitation, including endotracheal intubation.
- Early diagnosis and planning a care plan most appropriate for the baby.
- Communicating effectively with the patient's attendant, their relatives, doctors and other health care providers.
- Doing procedures such as IV cannulation, lumbar puncture, NG tube insertion, umbilical catheterization and ABG.
- Using laboratory and diagnostic facilities efficiently.
- Behaving appropriately with patients and their relatives, considering ethical and legal issues.
- Supervision of Medical Officers' (MO) activities and helping them with in-patient management.
- Reporting to the Clinical Supervisor or Director on a daily basis about the total number of admitted patients, their diagnosis, clinical condition and the number of patients admitted in the critical care department, in order to strengthen the handover system and ensure the best care of patients.
- Continuing self-education (CME) to improve skill and ability to perform duty efficiently.
- Joining clinical meetings once weekly in order to enrich knowledge and discuss clinical cases in the presence of Consultants of Neonatology and Paediatrics.

● 03/2019 – 12/2022 · SYLHET, BANGLADESH

Medical Officer

Al Haramain Hospital Limited

Department of Paediatrics, Neonatology and NICU

Main responsibilities

- Managing acute and non-acute paediatric patients and severely ill newborn babies.
- Care in the NICU and PICU, involving attending to admitted newborn babies, infants and children, followed by detailed history taking, clinical examination, involving seniors, starting required treatment and clinical follow-ups.

● 09/2018 – 02/2019 · DHAKA, BANGLADESH

Emergency Medical Officer

Greenland Hospital Limited

Main responsibilities

- Managing patients in the emergency department, keeping them for observation and making decisions with the help of consultants and sometimes of my own.
- Transferring a patient to the respective department following a complete evaluation.
- Attending morning rounds with consultants and evening rounds along with Medical Officers, and making decisions accordingly in the acute medicine department.
- Monitoring admitted patients' clinical status and immediate intervention for any deterioration.
- Doing procedures such as IV cannulation, lumbar puncture and NG tube insertion.

CLINICAL OBSERVERSHIP

• 09/2023 – 10/2023 · LONDON, UNITED KINGDOM

Clinical Observer

King's College Hospital

- Attending ward rounds in general paediatrics and different subspecialties, including paediatric gastroenterology, hepatology and endocrinology.
- Attending morning and evening handovers with consultants, registrars and SHOs.
- Observing paediatric A&E and the paediatric short stay unit. Completed PBLs training, participated in teaching of safeguarding and clinical cases, and took part in a workshop on improving handover quality and communication.
- Observed the rapid access clinic and OPD clinics of general paediatrics, asthma, allergy, liver, gastroenterology and diabetes.
- Involved in data entry on computer during Consultant rounds throughout the junior doctors' strike, and observed a number of procedures.
- Dealing with different types of patients — some simple, some complex and others needing referral to a specialised hospital.
- Assisting the job responsibilities of an SHO, including patient clerking, examination, ordering investigations, documentation, ward rounds, phone calls to patients and guardians, and referral calls to other departments.
